

Todd Van Aken

New Jersey Natural Gas

Todd Van is the Director of the SAVEGREEN program, NJNG's Energy Efficiency and Building Decarbonization offerings. He is responsible for the development, design, implementation and execution of the entire portfolio, with an annualized budget of approximately \$150 million. The portfolio includes a comprehensive suite of Residential, Commercial, Multifamily and Low-to-Moderate Income programs for NJNG's 580,000 customers.

Prior to his role with NJNG, Todd worked for a large electric and gas utility in various roles in energy efficiency program development, strategy, policy, and implementation since 2017. He was a key contributor to New Jersey State policy, making significant contributions to the 2020 New Jersey Energy Efficiency Framework under which the current programs operate. He has led New Jersey utility collaboratives and spoken on behalf of the seven Investor-Owned Utilities in the state.
